Pro Potch, our brand new speciality adhesive is here.

The adhesive is ideal for the popular napkin technique or decoupage technique. In the DIY technique, napkin, paper or fabric motifs are transferred to wood, cardboard, plastic, polystyrene and much more using the adhesive. To do this, Pro Potch is applied to the desired base surface. Position the napkin, paper or fabric on the wet Pro Potch and brush out the air bubbles from the centre outwards using a soft brush. Then leave to dry. After drying, Pro Potch becomes transparent. To protect the workpiece, we also recommend using Pro Potch as a varnish. To do this, simply apply another coat. This great and simple technique can be used to remodel a variety of objects. Pro Potch is solvent-free, water-based and available in a satin or matt finish. Unique design options are also available in combination with PappArt and wooden items.
